DIAMOND REPORT

This report is a statement of the diamond's identity and grade including all relevant information.

	NUMBER 1	81506651	MUMBAI, October 12, 2015									
	LABORATORY	REPORT (ORIGINAL)		TO W	HOM IT N	IAY CONC	ERN.					
DESCRIPTION SHAPE AND CUT	NATURAL DIA ROUND BRIL			;	Red	do not usual symbols ind n symbols ind	icate interr	nal charact	eristics.

The gemological analysis of diamonds, precious stones and other minerals must be carried out by gemologists with many years experience in this field who have a keen sense of the professional code of ethics governing their work as well as a thorough knowledge of crystallographic, optical and physical phenomenon.

The identification of the various species and varieties of stones, the distinction between natural and synthetic material, as well as various treatment methods currently encountered are all very sensitive factors. More specifically for diamonds, the laws of refraction and dispersion of light, the related geometric data as well as knowledge of all aspects involved in the cutting process are essential.

This gemological report is provided upon request of the customer and/or the owner of the gem. By making this report I.G.I. does not agree to purchase or replace the article. Neither I.G.I. nor any member of its staff shall, at any time, be held responsible for any discrepancy which may result from the application of other grading methods. Neither the client nor any purchaser of the gem shall regard this Report as an appraisal nor as a guaranty or warranty.

This report is subject to the terms and conditions set forth above and on reverse.
